production n8n workflows, zero errors

250/day

automation runs on a live UK storefront

13+

sites shipped & maintained, 8 platforms

10+

Shopify stores launched from zero

1 Summary

Full-stack developer who owns the whole system: the storefront, the integrations around it, and the automations between them. Currently the **sole technical owner of a live UK Shopify storefront and its B2B supplier portal**, running 43 production n8n workflows at roughly 250 runs a day with zero errors. Five years building for e-commerce, education and fitness brands in the UK, US and EU. I ask about the business goal before the spec sheet, document everything, and hand over systems the client owns outright.

2 Experience

AI Automation & Growth Systems Manager

Jun 2026 - Present

SNAC (Snac Fresh) · UK food e-commerce · Remote via BruntWork

- Sole technical owner of the live Shopify storefront, supplier portal, integrations and automation layer: Shopify, SparkLayer (B2B), PuppetVendor, Stripe, HubSpot, Xero, Calcurates, Resend, WhatsApp Business and Supabase
- Run 43 production n8n workflows (~250 runs/day) with zero errors; every workflow wired to a central failure alarm
- Built a repeatable, read-only health audit that sweeps 14 connected systems in one command (55 pass / 6 warn / 0 fail on first full run)
- Found and reconciled silent drift between the live theme and the Git repo; brought all 215 theme files into sync and built two-way tooling so routine deploys can't overwrite live work
- Fixed a supplier-portal logout loop that locked suppliers out; launched customer and supplier messaging (8 approved WhatsApp templates, 4 verified Resend domains)
- Coordinate directly with third-party vendors on fixes; daily written EOD reports to leadership with clear blockers and escalations

Shopify / Liquid n8n Supabase Stripe HubSpot Xero WhatsApp API Git

Freelance Developer & Virtual Assistant

Oct 2025 - Present

Self-employed · Remote clients

- Build automations and AI-powered workflow tools, including a Claude API job-posting classifier
- Website management, Shopify builds, content updates and light design
- VA support: inbox and calendar management, research and operations

Full-Stack Web Developer & Head Social Media Manager

Aug 2023 - Oct 2025

VCONN Virtual Solutions

- Led full-stack projects end to end: front-end UI and back-end systems for e-commerce stores, online courses and portfolio sites
- Managed a 7-person creative team (video editors, graphic designers, social media associates) across several Shopify stores and brands
- Delivered responsive interfaces and backend solutions, including SEO tools like the SEO Geotagger

Graphic Designer & Data Analyst

Dec 2022 - Apr 2023

Lokal Lab Siargao Inc.

- Internal graphics, report and document design; data analysis to support business operations

Technical Staff & Digital Marketing Specialist

Mar 2022 - Aug 2022

Bayatakan Farm

- Coordinated a 5-person team (tour guides, kitchen staff) while running social media and bookings; SEO strategy, technical support and digital solutions

CMS & DESIGN	WordPress, Wix, Squarespace, Thinkific, Kajabi, Teachable · Figma, Canva, Elementor
OPS	Git, GitHub, Vite, Jest · Asana, Slack, Hubstaff, Resend, WhatsApp Business API

4 Selected projects

SHOPIFY · B2B · AUTOMATION

Snac Fresh storefront & supplier portal

snacfresh.food

Live UK food e-commerce store plus B2B portal. 43 automations, 14-system health audit, theme/Git sync tooling.

SHOPIFY · PERFORMANCE · SEO

Dead Threads speed rescue

deadthreads.com

SEO restructure, asset compression and Core Web Vitals fixes for a slow store. Organic visibility and sales up.

AI · VOICE RECEPTIONIST

Garden Quote AI System

clarklindleysuan.com/projects/garden-quote-system

Multi-client voice AI receptionist demo with ElevenLabs and Twilio: intake flows, dynamic responses, real-time lead handling.

AI · AUTOMATION

Advanced Cold Call Dashboard

clarklindleysuan.com/projects/cold-call-dashboard-improved

AI-powered outreach system: live call state, auto-ending calls, dynamic lead tracking and call summaries.

WEB APP · SAAS

NaVA Productivity App

va-pro-demo.vercel.app

Full SaaS productivity platform: real-time timers, persistent state, client/task management, PDF reports.

WEB APP · SEO TOOLS

SEO Geotagger

geotagger-vconnx.vercel.app

Real-time geolocation tagging tool that embeds geo-metadata into content for SEO workflows.

MACHINE LEARNING · PYTHON

Job-fit classifier

clarklindleysuan.com/blog-ai-classifier

Classifier that scores OnlineJobs.ph listings against my profile; fewer applications, higher reply rate. Written up as a case study.

FRONTEND · STOREFRONTS

Brand sites & redesigns

clarklindleysuan.com/#work

Outlaw Fitness, Matsui Hair USA, BodegaLink Finder, The Dirt Army, Dan Nelson Real Estate, Dr. Zrinka.

5 Clients say

Clark built my Shopify store from scratch and I was blown away. Within the first month we started generating consistent revenue.

Liban Egal · Shopify client

Our store was slow and barely getting organic traffic. Clark overhauled SEO, optimised every asset and improved our Core Web Vitals dramatically.

Josh · Dead Threads

Three Figma mockups incredibly fast for our homepage concept. Exactly the premium feel we were looking for. Hired immediately after the design test.

Gavin · Balterley, fashion e-commerce

A synchronized video player demo with live chat and viewer count, so fast it was almost unbelievable. Minor bug fixed within hours with extra UX polish.

Ozan · Apex Growth, SaaS MVP

6 Education

Mindanao State University	2023
Northeastern Mindanao Colleges	2019
Taft National High School	2017

7 How I work

Weekly demos, no surprises. Staging link from week one, written scope and fixed price where possible, docs and a recorded walkthrough at handoff. I work in the client's morning (UK and US-East overlap), send daily written EOD reports, and treat a live store like production: audit first, change second, alarm on everything.
